

Large & Custom Air Receivers

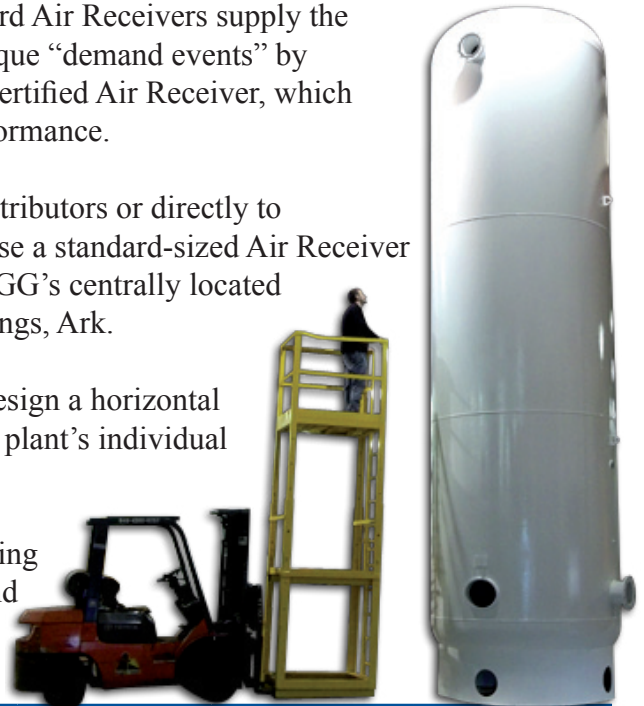

Standard and Custom-Designed to Meet Your Demand Events

TIGG's customized and standard Air Receivers supply the solution to your facility's unique "demand events" by providing a durable, ASME certified Air Receiver, which allows your plant to reach peak performance.

TIGG offers its products through distributors or directly to industrial end-users. You can purchase a standard-sized Air Receiver and have it shipped directly from TIGG's centrally located manufacturing facility in Heber Springs, Ark.

Or, our experienced engineers can design a horizontal or vertical Air Receiver around your plant's individual volume and dimensional needs.

Additionally, our skilled manufacturing team will apply customized liners and exterior coatings at your request.

PART #	GALLONS	DIMENSIONS	PSI	BASE RING
PV 660 V 165	660	42 X 117	165	Y
PV 660 V 200	660	42 X 117	200	Y
